## With Each Order Is a Story

Brick & Stone Graphics strives to meet the need of each customer we are in contact with. Whether the need be to purchase a pet rock for a special pet that has passed away, an engraved bench or a memorial bench as a gift for a grandparent, or an engraved brick campaign for an organization needing to raise funds. Brick & Stone Graphics considers each order very special. The great reward in our company is to know that through our products we are able to help bring closure and healing, and to help legacies to live on forever. We have found over the years that behind every product ordered is a story. We take each order and give it our very best knowing that “customer service at Brick & Stone Graphics is not a department – but an attitude.” Give us a call, email or go online and we will help you tell your story.

Brick & Stone Graphics creates lasting impressions with its custom engraved brick, stone, glass block, tile, benches and signs. You will find in this packet information and order forms regarding miscellaneous products, as well as the engraved brick fundraising program details.

If you are only interested in a miscellaneous product at this time, please forward the fundraising information on to your church or school or other group needing to raise money. The Engraved Brick program is a very positive program. It is a great way to raise a lot of money, honor people, and enhance your facility. It is an investment that lasts forever. We work nationwide with school districts, municipalities, churches, hospitals, parks, veteran memorials and non-profit organization.

Additionally, wedding/party planners, hotels, and conference planners use our engraved products as gifts and/ or decorations.

Photos are available on our website. We have many logos, or you can provide camera-ready art. Custom design charges @ \$25.00 per hour may apply if the art is not camera ready.

We recommend the Sandblast procedure due to the fact that the text and/or logos are hand sandblasted down into the aggregate of the brick. The depth of the blasting is minimized so it will not be a safety hazard, deep enough so it will not wear off with traffic and changes of the weather. We engrave on clay bricks as well as pavestone concrete pavers. We have access to clay pavers especially if we need to match an existing engraved brick with clay pavers.

***There is no minimum order required.***

Our goal is to make this project very profitable and easy for your organization, as well as our products availability to assist you with any need you might have.

***We look forward to hearing from you.***
